**Welcome back to
SOLO's newsletter!**

See what we've been up to lately.

**SOLO's latest round of
Outlook documents is now
available...**

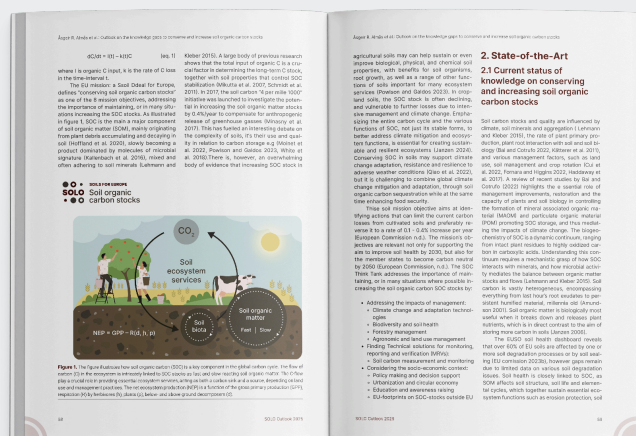

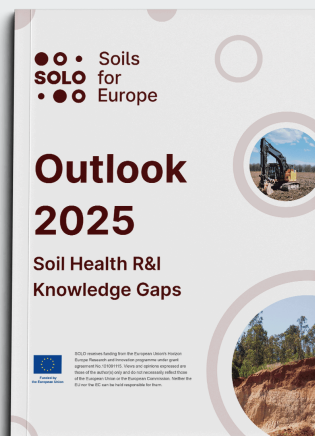

The latest round of SOLO's outlook documents, developed within the Think Tanks and addressing the Soil Mission objectives, is available on the [Soils for Europe platform](#).

Whilst the 2025 round is already published, a new review round for the documents will open soon, so stay tuned not to miss it!

If you would like to become a reviewer of SOLO's roadmaps, please register [here](#).

...and so is the Outlook 2025: Soil Health R&I Knowledge Gaps!

The Outlook 2025, beginning with an introduction to the SOLO project, brings together all individual Think Tank outlook documents produced in 2025 into a unified publication. It is available in the [Publications](#) section of SOLO's website, as well as on [Zenodo](#).

SOLO held yet another round of Soil Week events across Europe!

SOLO's partners held another round of the *Soil Week* events, uniting participants across Europe in a series of events dedicated to soil health, sustainability, and collaboration. Each *Soil Week* focused on the project's [Think Tank](#) topics and contributed to achieving the broader goals of the EU Soil Mission.

SOLO meetings you might have missed

SOLO consortium discusses project's future in Lund

SOLO consortium meeting, Lund University, May 2025

In May 2025, the SOLO consortium met at Lund University, Sweden, to review progress and plan next steps. Partners shared Work Package updates, refined the overarching roadmap, and discussed upcoming activities and communication plans.

SOLO partners and stakeholders gather in Évora, Portugal

SOLO stakeholder meeting, University of Évora, October 2025

In October 2025, the SOLO team met at the University of Évora to review progress and plan next steps for the Think Tanks. Partners and stakeholders also visited a regenerative farm in Alentejo, sparking discussions on soil health, sustainability, and how SOLO's work can guide future action across Europe.

More information and official conference website coming soon.

News from the WHEATWATCHER project

From soil sensing to smarter farming – watch the concept video

The Horizon Europe project **WHEATWATCHER** is developing an integrated system of advanced soil and crop monitoring tools, designed to support sustainable wheat production and food safety across Europe.

In its newly released **concept video**, the project presents how a combination of **stationary, mobile and remote sensing platforms**, together with **AI-powered analysis and cloud-based tools**, enables farmers to monitor soil and crop health in real-time. These insights are delivered through a user-friendly **Decision Support System (DSS)**, helping optimise input use, reduce contamination risks, and strengthen traceability along the grain value chain.

 **Watch the video and discover how WHEATWATCHER bridges the gap between data and decisions:**
